# MACHINE LEARNING TRAINING

Member of: **nasscom**

# Indian Cyber Security Solutions

in association with

# Indian Institute of Cyber Security

Kickstart your journey into Machine Learning with our practical, industry-focused training program.

Learn how to work with real-world data, build predictive models, and understand key concepts using Python and tools like NumPy, Pandas, Matplotlib, and Scikit-learn.

Gain hands-on experience through guided projects and develop skills required to solve real-world problems.

Enhance your career opportunities in Machine Learning and Data Science and become a certified professional.

# About the Program

Python preprocessing

model building

real-world data analysis

This program is designed to build a strong foundation in Machine Learning focus on practical learning.

Understand essential concepts like data preprocessing, model building, and evaluation, while working with industry-relevant tools such as NumPy, Pandas, Matplotlib, and Scikit-learn.

Through hands-on sessions and guided projects, you will develop the skills needed to solve real-world problems effectively.

Perfect for students and professionals looking to build their career in Machine Learning.

# Certification

After the completion of the course, candidates will get a joint certificate from Indian Cyber Security Solutions and Indian Institute of Cyber Security

# Course Fee

Class Room Training	Online LIVE Training
<p><b>Course Fee: INR 14,000 /-</b> (One-time payment)</p> <p><b>Course Duration: 40 Hours</b> <b>3 Months Training</b></p> <p>2-3 Classes Per Week X 2 Hours Each Day</p> <p><b>Batch Timing</b> Week End Classes   Week Days Classes</p>	<p><b>Course Fee: INR 14,000 /-</b> (One-time payment)</p> <p><b>Course Duration: 40 Hours</b> <b>3 Months Training</b></p> <p>2-3 Classes Per Week X 2 Hours Each Day</p> <p><b>Batch Timing</b> Week End Classes   Week Days Classes</p>

# C|ML– Machine Learning Course Module

# Key Highlights

# Why Choose

## Machine learning using python at ICSS

### Experienced and Renowned Instructors

Learn from industry professionals with real-world experience in AI, data science, automation, and machine learning—bringing practical insights directly to your training.

### Practical and hands-on Training

Master Machine Learning through hands-on labs, real datasets, and guided projects covering Python, ML algorithms, data preprocessing, model building, and evaluation.

### The program is affordable and flexible

Our program understands the value of flexibility and convenience, offering both online and in-person options. We prioritize accommodating your busy lifestyle.

### Global Recognition & Networking Opportunities

Gain industry-ready ML skills and certification that open doors to high-demand careers in data science, AI engineering, analytics, automation, and machine learning development.

# Eligibility Criteria

---

## Technical

**Individuals with a technical background can elevate their career by enrolling in the Certified Machine Learning Training**

- Graduates in science (B.Tech in CSE/IT/EC or BCA) can enroll.
- Commence with Certified Python Programmer course.
- Option to pursue Ethical Hacking course or C|EH certification.

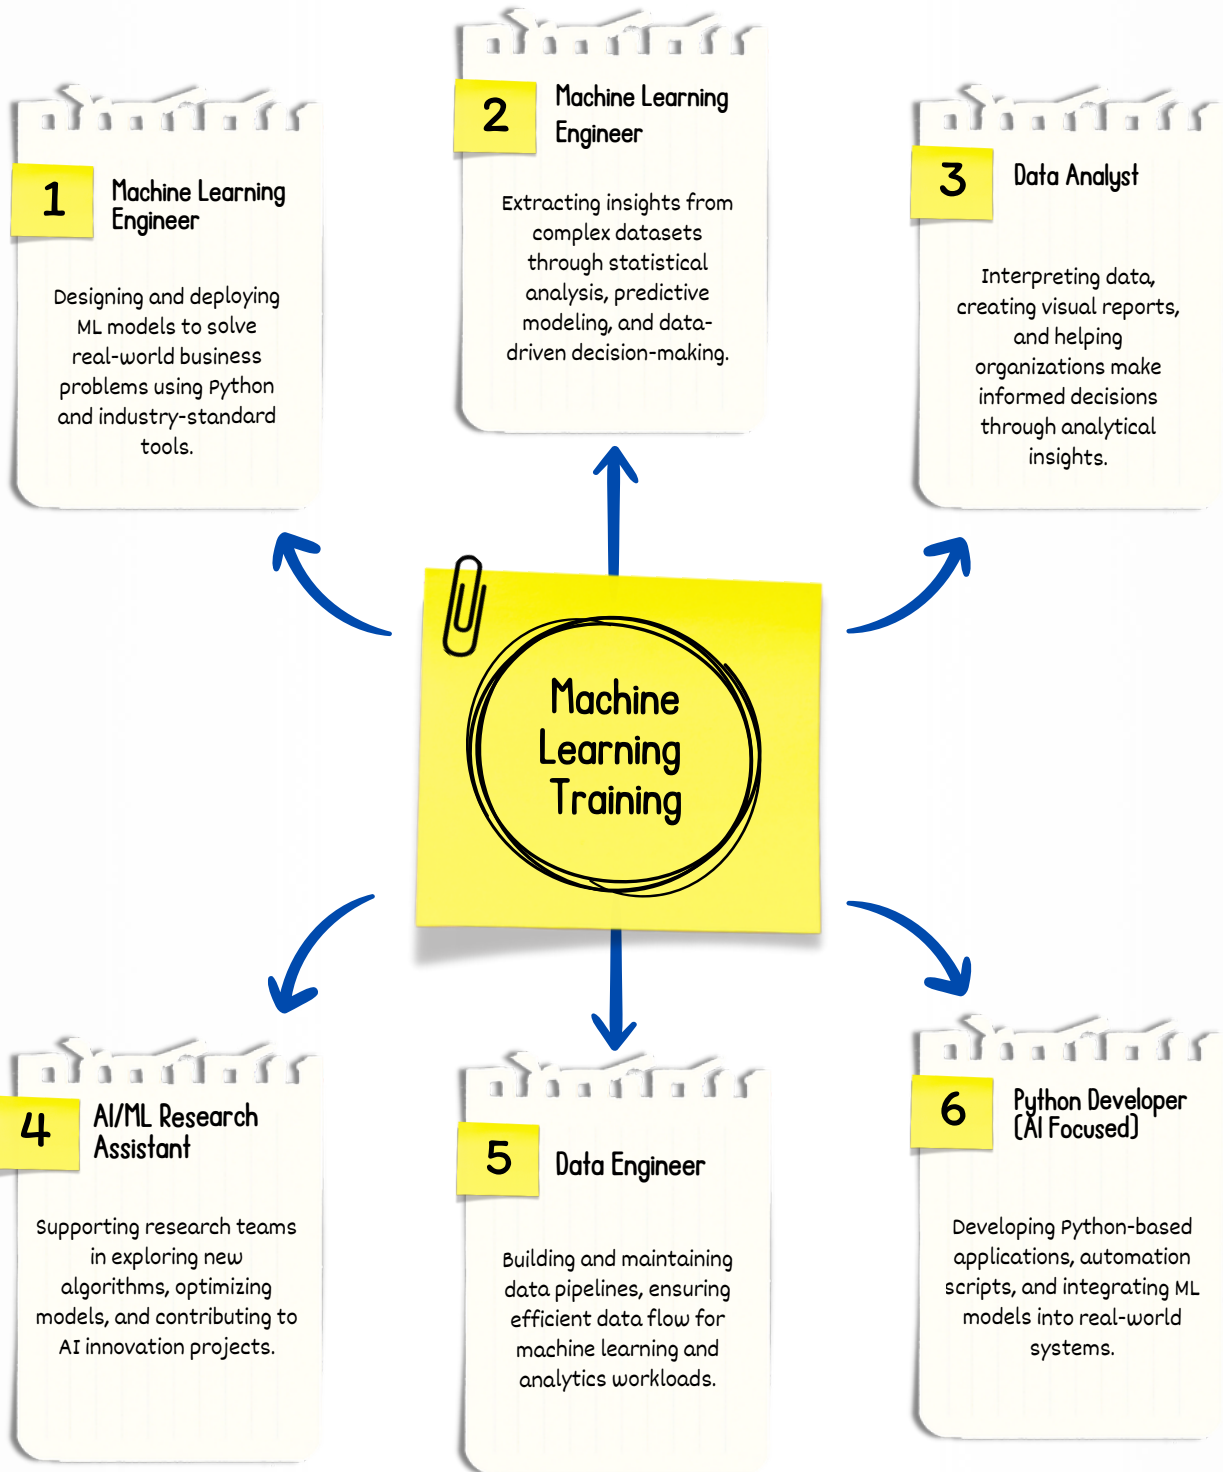

## Non-Technical

**Students from non-technical disciplines can also pursue the Certified Machine Learning Training**

- Arts, commerce, or non-science graduates eligible.
- Begin with Certified Network Professional course.
- Conclude with Certified Network Penetration Tester course.

# Job Opportunities

# Trainers Profile

---

- At Indian Cyber Security Solutions (ICSS), our Machine Learning and AI trainers combine strong academic foundations with real-world industry experience to deliver impactful and practical ML education.
- Trainers bring hands-on expertise in core areas such as supervised and unsupervised learning, deep learning, natural language processing (NLP), data visualization, and model deployment using Python, TensorFlow, Keras, Scikit-learn, and other industry-standard tools.
- Our team includes experienced data scientists, AI engineers, and analytics professionals who have worked on real-world machine learning solutions across domains like finance, healthcare, cybersecurity, e-commerce, and automation.
- Our trainers stay updated with emerging trends, tools, and technologies in the AI and data science ecosystem, ensuring students gain relevant, up-to-date knowledge through practical projects and hands-on coding sessions.
- ICSS emphasizes practical mastery—our trainers guide students through exercises that help them build ML models from scratch, test best practices in model evaluation, performance tuning, and deployment.
- Through personalized mentorship, regular assessments, and lab-based project completion, our trainers ensure learners gain the confidence to implement ML techniques in real-world scenarios.
- Career-oriented support helps learners develop job-ready skills, build strong portfolios, and prepare for roles such as Data Analyst, Machine Learning Engineer, AI Researcher, and NLP Specialist.

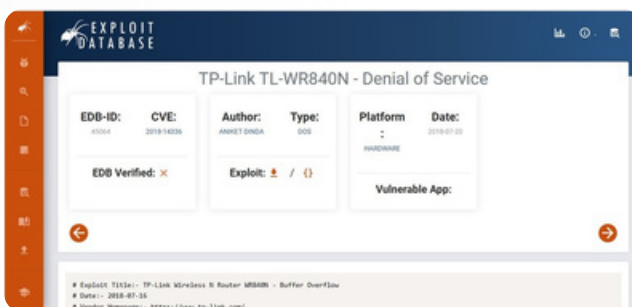

# Student Achievements

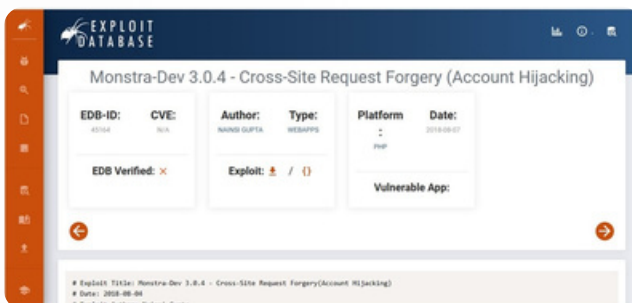

**Rabsun Sarkar** one of our students has found zero-day vulnerabilities in Google and in the Security Talent Website and also reported the same:

<https://securitydelta.nl/news/overview/hsd-responsible-disclosure-rabsun-sarkar-reported-a-vulnerability-in-the-security-talent-website>

**Aniket Dinda** is our student who has found out about Zero-Day Vulnerability and has been published on Exploit DB:

<https://www.exploit-db.com/exploits/45064>

**Nainsi Gupta** is our student who has found out about Zero-Day Vulnerability and has been published on Exploit DB:

# Other Collaborators

Parul University: Indian Cyber Security Solutions (ICSS) is delighted to join forces with Parul University in April 2022, marking the start of a five-year strategic collaboration focused on pushing the boundaries of cybersecurity education and research. ICSS will be investing its expertise and resources into this venture, equipping students with unrivaled skills for success in their field - ultimately igniting positive change across the industry through our steadfast commitment. We are brimming with anticipation over what incredible results will come from this partnership!

MAKAUT (ISKFGI College): With the ever-growing demand for skilled cybersecurity professionals. ICSS has teamed up with SKFGI College in a long-term partnership to establish an industry-leading program. For 10 years we will use our wealth of expertise and resources to ensure that students receive cutting-edge knowledge and skills from this collaboration- creating future leaders who can tackle any cybersecurity challenge. Our ambition is clear-develop tomorrow's talent today by empowering young minds into becoming successful digital citizens!

**L**OVELY  
**P**ROFESSIONAL  
**U**NIVERSITY

Lovely Professional University: Indian Cyber Security Solutions has collaborated with LPU to organize cyber security workshops, Hackathons and Bootcamps. The students at LPU put their skills to the test, making for a truly inspiring event. LPU and ICSS have decided to organize more such events as these events help them to sharpen the skills.
